

# Sphere System Requirements

---

Sphere is a Web-based application. To use it, you need a computer that can access the Internet.

## Operating System Requirements

Your computer must be running, at a minimum:

- Microsoft Windows - 95, 98, NT, 2000, ME, XP, Windows 7
- If you are using an Apple computer, it must be OS 9 or OS 10. You also need a Windows OS emulator installed, such as the latest version of Microsoft Virtual PC.

## Web Browser Requirements

We recommend that you use the following Web browser:

- Microsoft Internet Explorer version 6 through 8

**Note:** If you are using a combination of Internet Explorer 5.5 and Service Pack 3, you may experience difficulties with the Batch Entry system. Contact Technical Support for assistance.

Sphere on Internet Explorer 8 (IE 8) has been tested by our Quality Assurance team to ensure there is no interruption to your business processes. However, it is possible that moving from IE 7 to IE 8 may create unforeseen issues for some Web sites created and hosted using our CMS with certain custom Web applications, custom code, or HTML scripting. We recommend that you review your Web sites to ensure they are working properly after installing IE 8.
